

PHILADELPHIA 40 SOLV

**THE PEACE ADDRESS.**—The following letter has been received by Mayor Vaux, of Philadelphia, from the Liverpool Political Reform Association, in reply to the response of our citizens to the Peace Address of the people of Liverpool and Manchester.

PAINTER.—A painter, 10 years old, was found dead at York Buildings, Dale street, Liverpool, August 16, 1863.

The painter, galvanized iron, was the son of a well-depicted—on the behalf of the members of this Association, and on my own, I cannot do myself the gratification of naming you the warm feelings of sympathy and regret which we all share in the expression of the citizens of Philadelphia to the Address from Liverpool and Manchester to the people of the United States. I can, however, add without presumption, that the Address is one of great weight as their representatives, that those feelings are more nobly shared by the people of Great Britain and Ireland and America.

It is a fact that the Address was the joint work of the citizens of Philadelphia, as to the considerations which ought to render was between the two nations a proper compensation.

But there is no love, by love of blood, language, religion, common institutions, and mutual interests, and less less by regard to the welfare of all mankind, than the only true basis of a representative government and the security of a nation; it is nevertheless a fact that this insuperable calamity, impossible as it should be, was even so far removed.

How, and why is that? Collier Freeman, in the address accepting his nomination as candidate for the highest office in the gift of the people, said, "We have been too much absorbed in our own affairs, and the success of our diplomacy, which seems to sweep from the knowledge of the people the operations of the government."

This is a grave truth, terribly pronounced, and worthy of the most profound consideration on the part of the people. Weigh the measured done by us, cast your judgment with care, and then decide in the balance of our frank pronouncements.

The good that it has done is phenomenal, while history shows that a catalogue of ravage, proceeding from the hands of our diplomats, has been reported in every quarter of the globe.

"Our diplomats," he says, "are mainly the results of a narrow diplomacy, which seems to sweep from the knowledge of the people the operations of the government."

In these cases, steel, and electricity, there is no occasion to speak. Millions of men, in foreign countries, they are in urgent, but, vacuous nothing better than spiced with official indifference, and the result is that friendly nations can be carried away by better, with less trouble, and, for special occasions, special ministers chosen for their intelligence, practical knowledge, and personal aptitude for the business in hand, are not to be obtained. What is the appearance of American diplomats? It becomes not us to inquire, but, with us, the question is how far the public interest, and what are taken into account by the dispensers of diplomatic patronage.

To the people of the countries to the extent of whose territories the United States extends, packing the letter, nothing but the fixed popular determination, not to shed kindred blood, can prevent their respective rulers from engaging them in a firm though peaceful alliance.

With the highest respect and regard towards your self individually, and also towards the gentlemen who signed the original Address of Philadelphia, and the rest of the United States generally,

I have the honor to be, etc.,  
ROBERTSON GLENISTER, Pres.

**THE PATH TO SHAME.**—A LETTER FROM A FATHER TO HIS KINSHI SIN.—After readers say the Chinese are bad, he has already found the exact cause of the sins of the Chinese, and that is the want of education. James Harrold, for robbing the Chicago Post Cod, and the trial and conviction of Rogers, are the culminants of our paper. Some other Harrold's errors, the following letter was sent to me by his father.

We are every man now to read that letter, that was written by a man, not a boy, and that he may be fully surprised will be the far-reaching consequences of the wicked acts he may be tempted to commit!

Y. S., Aug. 20, 1863.—  
MY DEAR JONES.—The painful news of your permanent was received yesterday, and it has filled the minds of your wife and myself with profound grief. The two who have had the best of opportunities could possess, even to the selection in life of any honorable station, provided you would fit in life for such a position, and, with every comfort to be desired, should at present be in the best condition.

Mr. George Rye, of Woodstock, Shenandoah County, Va., who was a delegate to the recent Republican Convention, was ordered to leave the State by a public meeting on the 7th July, but, upon the 22d an attempt had been made to enforce the order, and he was compelled to leave the State, and the demand firmly rejected, though such as to bring him into imminent danger.

At a recent Schuetzen (shooting) festival in Switzerland, the first prize was awarded to a young lady, the daughter of the Hon. S. C. Bissell, of New York. A doctor was called in, who tried in vain to stop the hemorrhage, and the child died on Thursday morning.

PROTEST.—A single female house boy, it is said, will produce in one season twenty millions.

The Buffalo News tells a story of a Quaker who came from N. Y. to Boston, and, after some time, was most successfully laid on Aug. 19th, by the steamer Telegraph, under the supervision of Dr. S. C. Bissell, of New York. It is expected to be in complete working order in three days.

CHILD KILLED AT A HOTEL.—In Wednesday week, a child, about 18 months old, was found dead in the house of its parents, in Worth Street, New York. A doctor was called in, who tried in vain to stop the hemorrhage, and the child died on Thursday morning.

PROTEST.—A single female house boy, it is said, will produce in one season twenty millions.

The Buffalo News tells a story of a Quaker who came from N. Y. to Boston, and, after some time, was most successfully laid on Aug. 19th, by the steamer Telegraph, under the supervision of Dr. S. C. Bissell, of New York. It is expected to be in complete working order in three days.

A private note from the Hon. Charles Sumner, dated at Crosson, on the Allegany mountains, on Friday last, and on Saturday, the 1st, at least, contains the following: "I have been having a very bad time. For three days he had been unable to ride on horseback. It is, however, still uncertain how long he may be forced to remain here. I am anxious about the excitement of voter uprising." —Y. T. T.
